

HUGO BOSS

Energy policy

- The energy guidelines of HUGO BOSS are underlying the internationally recognized energy management system (ISO standard 50001).
- The improvement of the energy performance is a long-term process, which HUGO BOSS actively pursues with the support of all fellow employees.
- HUGO BOSS considers the compliance of all enforced statutory requirements to be an obligation and an implicitness.
- The energy policy of HUGO BOSS aims for a sustainable and responsible handling of all energy resources in use.
- HUGO BOSS practices a transparent energy policy and commits to providing the necessary information and resources, as well as the means in order to accomplish the energy objectives and energy targets.
- In order to improve the company's own energy balance, energy objectives and targets are being established, newly positioned and their implementation monitored continuously.
- HUGO BOSS sets a high value on finding energy efficient solutions, particularly when procuring energy services and products.
